No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

18 PLACE OF BURIAL, CREMATION, OR REMOVAL: Winthrop (Cemetery) Winthrop (City or town) DATE OF BURIAL: 10/25/26, 19

19 UNDERTAKER: C. R. Bennison ADDRESS: Winthrop

1. WRITE PLAINLY, WITH UNFADING INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied.
AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified.
Exact statement of OCCUPATION is very important. See instructions on back of certificate.

50,000

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer, Farm Laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . until he has received a permit from the board of health or its agent. . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk** . . . **a satisfactory written statement containing the facts required by law to be returned and recorded**, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, **the sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, **first,** the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: if primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

Oct. 29 1926

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer*, *Farm Laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body.. until he has received a permit from the board of health or its agent. .or... from the clerk of the town where the person died:...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc of ....., (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of ---------- (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.

For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

Nov. 6, 1926

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

State of Rhode Island.

CHAPTER 121, GENERAL LAWS, 1909.

OF THE REGISTRATION OF BIRTHS, DEATHS AND MARRIAGES

SEC. 20. The clerk or registrar of each town and city shall on the first day of each and every month make a certified copy of all births, marriages and deaths recorded in the books of said town or city during the previous month, whenever the parents of the child born, or the bride or the groom, or the deceased person, were resident in any other town or city in this State or in any other state at the time of said birth, marriage or death; and shall transmit such certified copies to the clerk or registrar of the town, city or state in which such parents of the child born, the bride or the groom, or the deceased, were resident at the time of said birth, marriage or death, stating in case of a birth, the name of the street and number of the house, if any, where such parents resided, the place of birth of such parents and the maiden name of the mother, whenever the same can be ascertained; and the clerk or registrar so receiving such certified copies shall record the same in the books kept for recording births, marriages and deaths. Such Certified copies shall be made upon blanks to be furnished for that purpose by the secretary of the state board of health.

ADDRESS

AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified.
Exact statement of OCCUPATION is very important. See instructions on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer*, *Farm Laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . until he has received a permit from the board of health or its agent. .or. . . from the clerk of the town where the person died; . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first,** the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;... **No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

Nov 12 1926

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

R-303

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk, . . .** a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . ***General Laws, Chap. 38, Sec. 6.***

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—***General Laws, Chap. 38, Sec. 7.***

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person) .....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.— ***General Laws, Chap. 38, Sec. 14.***

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

200,000 9-25 NO 2662 3

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia,","Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;... **No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

See instructions and extracts from the laws on back of certificate.

200,000 9-25 NO. 2662-3.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia,", "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded**, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**. . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

200,000 9-25 NO 2662 3

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

02

AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer, Farm Laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . until he has received a permit from the board of health or its agent. .or. . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation. the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia,". "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, when same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;... **No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

N.B.—WHILE PENALTY, WITH IMPRISONMENT, ATTACHES TO FALSE RETURNS, CERTIFICATES should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

200,000 9-25 NO. 2662 3.

Lic. 21. 1926

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died;. . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. . .** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

ADDRESS

AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified.
Exact statement of OCCUPATION is very important. See instructions on back of certificate.

50,000

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer, Farm Laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body.. until he has received a permit from the board of health or its agent. .or. . from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died [defined so that it can be classified under the international classification of causes of death], where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . —*Revised Laws, Chap. 29, Secs. 10 and 1, as amended by Acts of 1910, Chap. 322.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . **no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. **If death is caused by violence, the medical examiner only shall make such certificate.** . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with **the cause and manner of his death,** and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

COPIES OF RECORDS OF DEATHS OF NON-RESIDENT DECEDENTS

The clerk of each city and town shall forthwith make certified copies of the records of all . . . deaths recorded during **the previous month,** if the . . . deceased [was a resident] of any other city or town in this commonwealth or in any other state at the time of said . . . death, and transmit them to the clerk of the city or town of which such . . . deceased person [was] resident at the time of the said . . . death . . . and the clerk of a city or town in this commonwealth so receiving such certified copies, or certified copies of . . . deaths, from the clerk of a city or town without the commonwealth, shall record the same. — *Revised Laws, Chap. 29, Sec. 13, as amended by Acts of 1910, Chap. 93, Sec. 3.*

200,000 9-25 NO. 2662 3.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia,". "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of ---------- (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.

Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;... **No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**... The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

Jan. 2. 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

Jan. 3 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...**The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

Dr. Mahoney, Hinton Street, Hinton

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . .** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer*, *Farm Laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body.. until he has received a permit from the board of health or its agent. .or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk, . . .** a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person) .....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.— *General Laws, Chap. 38, Sec. 14.*

plied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified.
Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, celluiitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, sepiicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ..*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk,** . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; **and (2) under manner,** the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person).....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.— *General Laws, Chap. 38, Sec. 14.*

INSTRUCTIONS: PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See should be carefully supplied. AGE should be stated EXACTLY. instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . .** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk,** . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths **supposably due to violence.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the **cause** and **manner** thereof, and will specify: (1) Under **cause,** the nature of an injury and of its consequences; and (2) under **manner,** the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to **disease,** specify: (1) Under **cause,** its known or presumable nature; and (2) under **manner,** indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person) .....

.....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.— *General Laws, Chap. 38, Sec. 14.*

Jul. 5. 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

Dr. Kelly, Washington Avenue, Hinthrop

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . .** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to **all deaths supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds*. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons found dead.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

... He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk,** . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . **He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.**—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person).....

.....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.— ***General Laws, Chap. 38, Sec. 14.***

See instructions and extracts from the laws on back of certificate.

200,000 9-25 No 266 3

Feb. 14 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

. Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . a satisfactory written statement containing the facts required by law to be returned and recorded**, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

Feb. 18. 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.**..The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

FORM NO. 12

MARGIN RESERVED FOR BINDING

N. B.—WRITE PLAINLY, WITH UNFADING INK (WRITING FLUID)—THIS IS A PERMANENT RECORD. EVERY ITEM OF INFORMATION SHOULD BE CAREFULLY SUPPLIED. AGE SHOULD BE STATED EXACTLY. PHYSICIANS SHOULD STATE THE CAUSE OF DEATH IN PLAIN TERMS, SO THAT IT MAY BE PROPERLY CLASSIFIED. EXACT STATEMENT OF OCCUPATION IS VERY IMPORTANT.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *..Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap. 114, Sec. 45, G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap. 114, Sec. 46, G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died;. . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.—*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

200,000. 9-26. NO. 6373

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body.. until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *..Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap. 114, Sec. 45, G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap. 114, Sec. 46, G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*, *Bronchopneumonia* ("Pneumonia, unqualified, is indefinite); [illegible] *Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or...from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.....*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . . or . . . from the clerk of the town where the person died;. . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk,** . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk, . . .** a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DATE OF BURIAL 3-15, 1927

19 UNDERTAKER J. L. BURKE

ADDRESS

AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified.
Exact statement of OCCUPATION is very important. See instructions on back of certificate.

02

$0,000

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer, Farm Laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . until he has received a permit from the board of health or its agent. . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

N.B.—WRITE PLAINLY, WITH UNFADING BLACK INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

200,000 9-25 NO 2662 3.

March 14. 1921

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk, . . .** a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish** for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person).....

.....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.—*General Laws, Chap. 38, Sec. 14.*

200,000 9-25 NO 2662 3

March 16 1912

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded**, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

WHITE PENCIL WITH CARBONS USED. THIS IS AN ORIGINAL RECORD. Typewriting should be applied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

March 17, 1921

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

RM R-301

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

March 19, 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;... **No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap. 114, Sec. 45, G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap. 114, Sec. 46, G. L., as amended.*

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . until he has received a permit from the board of health or its agent. . or. . from the clerk of the town where the person died: **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known: otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

Completed Certificate.

GEORGE BURGESS MAGRATH, M.D.
Medical Examiner

The Commonwealth of Massachusetts

MEDICAL EXAMINER FOR SUFFOLK COUNTY

Office of the Northern Division

274 BOYLSTON STREET, BOSTON

To THE TOWN CLERK, WINTHROP, MASSACHUSETTS:—

I hereby certify that on the 10th and 11th days of April,

in the year 1927, in accordance with the provisions of law, I examined the body and made personal inquiry into the cause and manner of the death of

MAJOR SIMPSON

aged fifty-nine years, late of 283 Court Road, Winthrop, Mass.,

who died at 283 Court Road, Winthrop, Massachusetts, on

the tenth day of April, in the year 1927.

I further declare it to be my opinion that the said decedent **died from**

Poisoning by carbon-monoxide incidental to the operation by himself of a motor vehicle.

(Found dead in a private garage housing his own car the engine of which was running idle.)

WITNESS my hand and seal this 26th day of May,

in the year 1927.

Geo Burgess Magrath, M.D.

Medical Examiner for Suffolk County.

200,000. 9-26. NO. 6373

April 1, 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *General Laws, Chapter 46, Section 9.*

No undertaker or other person shall bury a human body . . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . .** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *General Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the **cause** and **manner** thereof, and will specify: (1) Under **cause,** the nature of an injury and of its consequences; and (2) under **manner,** the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to **disease,** specify: (1) Under **cause,** its known or presumable nature; and (2) under **manner,** indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person) . . . . . .

. . . . . .

. . . . . .

. . . . . .

. . . . . .

. . . . . .

. . . . . .

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained. — *General Laws, Chap. 38, Sect. 14.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK– THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

Apr. 3, 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk,** . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person).....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.— *General Laws, Chap. 38, Sec. 14.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.....*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

R-303

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk,** . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under **cause,** the nature of an injury and of its consequences; and (2) under **manner,** the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under **cause,** its known or presumable nature; and (2) under **manner,** indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person).....

.....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.— ***General Laws, Chap. 38, Sec. 14.***

See instructions and extracts from the laws on back of certificate.

200,000. 9-26. NO. 6373

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ..*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter. Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis. peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . . — *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. — *Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. — *Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.....*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

... He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or...from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of ---------- (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk,** . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person).....

.....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.— ***General Laws, Chap. 38, Sec. 14.***

200,000. 9-26. NO. 6373

April 21 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ..*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman,* etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner,* (*b*) *Cotton mill;* (*a*) *Salesman,* (*b*) *Grocery;* (*a*) *Foreman,* (*b*) *Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer, Farm Laborer, Laborer—Coal mine,* etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework,* or *At home,* and children, not gainfully employed, as *At school* or *At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid,* etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, **first,** the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum,* etc., *Carcinoma, Sarcoma,* etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis,* etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia,*" "PUERPERAL *peritonitis,*" etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds*. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

200,000. 9-26. NO. 6373

April 21. 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. May 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended,*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...**The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer, Farm Laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . until he has received a permit from the board of health or its agent . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

RM R-301

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or...from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died [defined so that it can be classified under the international classification of causes of death], where contracted, the duration of his last illness, when last seen alive by the physician and the date of his death. . . . — *Revised Laws Chap. 29, Secs. 10 and 1, as amended by Acts of 1910, Chap. 322.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . **no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. **If death is caused by violence, the medical examiner only shall make such certificate.** . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

COPIES OF RECORDS OF DEATHS OF NON-RESIDENT DECEDENTS

The clerk of each city and town shall forthwith make certified copies of the records of all . . . deaths recorded during the previous month, if the . . . deceased [was a resident] of any other city or town in this commonwealth or in any other state at the time of said . . . death, and transmit them to the clerk of the city or town of which such . . . deceased person [was] resident at the time of the said . . . death . . . and the clerk of a city or town in this commonwealth so receiving such certified copies, or certified copies of . . . deaths, from the clerk of a city or town without the commonwealth, shall record the same. — *Revised Laws, Chap. 29, Sec. 13, as amended by Acts of 1910, Chap. 93, Sec. 3.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.....*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

FORM R-301

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate. 2.00.000. 9-26. NO. 6373

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

June 4. 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ..*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

June 18. 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of ---------- (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.

11—3184

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died [defined so that it can be classified under the international classification of causes of death], where contracted, the duration of his last illness, when last seen alive by the physician, and the date of his death. . . . — *Revised Laws Chap. 29, Secs. 10 and 1, as amended by Acts of 1910, Chap. 322.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent, . . . or . . . from the clerk of the city or town in which the person died; . . . **no such permit shall be issued until there shall have been delivered to such board, agent or clerk, . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which . . . shall be accompanied by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, the chairman of the board of health, if a physician, or any physician employed by said board or by the selectmen for the purpose, shall upon application make such certificate as is required of the attending physician. **If death is caused by violence, the medical examiner only shall make such certificate.** . . . The person to whom the permit is so given and the physician who certifies to the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require. — *Revised Laws, Chap. 78, Sec. 38.*

Medical examiners shall, in all cases, certify to the city or town clerk or to the city registrar in the place where the deceased died, his name and residence, if known, otherwise a description of such person as full as may be, with the cause and manner of his death, and shall make examination upon the view of the dead bodies of only such persons as are supposed to have come to their death by violence. — *Revised Laws, Chap. 24, Sec. 8.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical Examiners** will investigate and certify to all deaths supposably due to injury. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

COPIES OF RECORDS OF DEATHS OF NON-RESIDENT DECEDENTS

The clerk of each city and town shall forthwith make certified copies of the records of all . . . deaths recorded during the previous month, if the . . . deceased [was a resident] of any other city or town in this commonwealth or in any other state at the time of said . . . death, and transmit them to the clerk of the city or town of which such . . . deceased person [was] resident at the time of the said . . . death . . . and the clerk of a city or town in this commonwealth so receiving such certified copies, or certified copies of . . . deaths, from the clerk of a city or town without the commonwealth, shall record the same. — *Revised Laws, Chap. 29, Sec. 13, as amended by Acts of 1910, Chap. 93, Sec. 3.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died;. . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent. . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk,** . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.**

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the **cause** and **manner** thereof, and will specify: (1) Under **cause,** the nature of an injury and of its consequences; and (2) under **manner,** the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under **cause,** its known or presumable nature; and (2) under **manner,** indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

R. S.—WRITE PLAINLY, WITH UNFADING INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied.
AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified.
Exact statement of OCCUPATION is very important. See instructions on back of certificate.

—50,000

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer*, *Farm Laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body.. until he has received a permit from the board of health or its agent. .or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.....*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

. . .He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *..Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap. 114, Sec. 45, G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap. 114, Sec. 46, G. L., as amended.*

If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

N. B.—Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

Wm. D. Childress Health Officer 7/16/27 1278

July 15, 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritonaeum*, etc., *Carcinoma, Sarcoma*, etc., of ..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital." "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Haemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septichaemia*," "PUERPERAL *peritonitis*," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis, tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, haemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyaemia, septichaemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.

Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died;. . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

2,000,000. 9-26. NO. 6373

July 22. 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired*, *6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.....*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

200,000 9-25 NO 2662 3

July 26 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

02

AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified.
Exact statement of OCCUPATION is very important. See instructions on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

N. No. 3

Aug 4. 1927

RNITED STATES STANDARD CERTIFICATE OF DEATH

oved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, first, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of _____ (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.

11—3184

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of ..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

NITED STATES STANDARD CERTIFICATE OF DEATH

oved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of _____ (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis, tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.

20 I HEREBY CERTIFY that a satisfactory standard certificate of death was filed with me BEFORE the burial or transit permit was issued W. D. Childs 9.B.9.
Official position Health Officer Date of issue of permit 8/9/27 Permit No. 1284

Aug. 1, 1912.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired*, *6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws. Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap 46, Sec. 9.*

No undertaker or other person shall bury a human body.. until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

Ernest C. Bacon
Aug 15, 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;... **No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

302

AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified.
Exact statement of OCCUPATION is very important. See instructions on back of certificate.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.*; *Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

FORM R-303

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk,** . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the **cause** and **manner** thereof, and will specify: (1) Under **cause,** the nature of an injury and of its consequences; and (2) under **manner,** the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to **disease,** specify: (1) Under **cause,** its known or presumable nature; and (2) under **manner,** indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer, Farm Laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . until he has received a permit from the board of health or its agent . .or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death. — Name, **first,** the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of_____ (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS STATE MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train — accident; Revolver wound of head — homicide; Poisoned by carbolic acid — probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Cases for the Medical Examiners. — Under the provisions of chapter 24 of the Revised Laws deaths under the following conditions must be referred to the Medical Examiners:

1. Deaths following injury or violence, as *Burns*, *Falls*, *Drowning*, *Gas poisoning*, *Suicide*, *Homicide*, etc.
2. Deaths supposedly caused by violence, as *Criminal abortion*, *Poisoning*, *Starvation*, *Suffocation*, *Exposure*, etc.
3. Sudden deaths of persons not disabled by recognized disease, as *A death upon the street, or one supposed to be due to Alcoholism*, etc.
4. Deaths under circumstances unknown, as *A person found dead*, etc.

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc. of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

200,000. 9-26. NO. 6373

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.....*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

N. B.—WRITE PLAINLY, WITH UNFADING INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

Henry L. Pierce
Health Officer

[Approved by U. S. Census and American Public Health Association]

Statement of occupation. — Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer — Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death. — Name, **first,** the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of_____ (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS STATE MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train — accident; Revolver wound of head — homicide; Poisoned by carbolic acid — probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis, tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Cases for the Medical Examiners. — Under the provisions of chapter 24 of the Revised Laws deaths under the following conditions must be referred to the Medical Examiners:

1. Deaths following injury or violence, as *Burns, Falls, Drowning, Gas poisoning, Suicide, Homicide*, etc.
2. Deaths supposedly caused by violence, as *Criminal abortion, Poisoning, Starvation, Suffocation, Exposure*, etc.
3. Sudden deaths of persons not disabled by recognized disease, as *A death upon the street, or one supposed to be due to Alcoholism*, etc.
4. Deaths under circumstances unknown, as *A person found dead*, etc.

ADDITIONAL SPACE FOR FURTHER STATEMENTS BY PHYSICIAN.

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body.. until he has received a permit from the board of health or its agent. .or... from the clerk of the town where the person died;. .**No such permit shall be issued until there shall have been delivered to such board, agent or clerk**...**a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature ot the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer, Farm Laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec 9.*

No undertaker or other person shall bury a human body.. until he has received a permit from the board of health or its agent. .or. . from the clerk of the town where the person died;. . .**No such permit shall be issued until there shall have been delivered to such board, agent or clerk**.. **a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** ..The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

See instructions and extracts from the laws on back of certificate.

200,000 9-25 NO. 2662 3

Sept. 1, 1921

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . until he has received a permit from the board of health or its agent. . . or . . . from the clerk of the town where the person died: . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

See reverse side for extracts from the laws relative to the return of certificates of death.

4M-12-24-No. 8704

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk,** . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**—*General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . **He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.**—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person).....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.—*General Laws, Chap. 38, Sec. 14.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body.. until he has received a permit from the board of health or its agent. .or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk**...**a satisfactory written statement containing the facts required by law to be returned and recorded**, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body.. until he has received a permit from the board of health or its agent. .or. . from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

R. B.—WHITE BURNEY, WITH BURNING BLACK INK. (INDIA INK) ON WHITE PAPER. should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died;. . .**No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**. . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to **all deaths supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 20 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap. 114, Sec. 45, G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap. 114, Sec. 46, G. L., as amended.*

ADDRESS

AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified.
Exact statement of OCCUPATION is very important. See instructions on back of certificate.

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc , without more precise specification, as *Day Laborer, Farm Laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds*. Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body.. until he has received a permit from the board of health or its agent. .or. . from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

RM R-303

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk,** . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person) .....

.....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.— ***General Laws, Chap. 38, Sec. 14.***

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.....*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap. 114, Sec. 45, G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. .He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap. 114, Sec. 46, G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap,* 38, *Sec. 6.*

..He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *...Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap. 114, Sec. 45, G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap. 114, Sec. 46, G. L., as amended.*

N.B.—WRITE PLAINLY, WITH UNFADING BLACK INK. THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.
200,000. 9-26. NO. 6373

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation. the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

19 UNDERTAKER C. A. Rollins

ADDRESS E. Boston

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

200,000 9-25 NO. 2662 3

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anæmia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia,". "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body. . . until he has received a permit from the board of health or its agent. . . or. . . from the clerk of the town where the person died;. . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk. . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

DATE OF BURIAL Oct 16, 1927.

19 UNDERTAKER Charles P. Bennison ADDRESS Winthrop.

N.B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

200,000. 9-26. NO. 6373

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap. 114, Sec. 45, G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap. 114, Sec. 46, G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

0,000

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;... **No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

OFFICE OF THE SECRETARY
DIVISION OF VITAL STATISTICS
200,000. 9-26. NO. 6373

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

0,000

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

2,000,000. 9-26. NO. 6373

27-20M.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired*, *6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.....*Gen. Laws*, *Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L.*, *as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws*, *Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws*, *Chap. 38*, *Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L.*, *as amended.*

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . until he has received a permit from the board of health or its agent. . or . . from the clerk of the town where the person died; . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk a satisfactory written statement containing the facts required by law to be returned and recorded**, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require —*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

Nov. 4, 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

N. B.—WRITE PLAINLY, WITH UNFADING INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, **first,** the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of _____ (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis*, *tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.

Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. G.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

302

AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified.
Exact statement of OCCUPATION is very important. See instructions on back of certificate.

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

19 PLACE OF BURIAL OR REMOVAL: Winthrop Center, Mass. DATE OF BURIAL: Nov. 19, 1927

20 UNDERTAKER: C.R.Bennison. ADDRESS: Winthrop, Mass.

11-2184

Permit Issued 11/18/27. By W.D. Childress Health Office. No-1328

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritonaeum*, etc., *Carcinoma, Sarcoma*, etc., of ..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *20 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anaemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Haemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uraemia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septichaemia*," "PUERPERAL *peritonitis*," etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis, tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

NOTE.—Individual offices may add to above list of undesirable terms and refuse to accept certificates containing them. Thus the form in use in New York City states: "Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, haemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyaemia, septichaemia, tetanus." But general adoption of the minimum list suggested will work vast improvement, and its scope can be extended at a later date.

MR-301

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.....*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first,** the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc,), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 43, *G. L., as amended.*

Nov. 25, 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia,". "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate . . .** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer, Farm Laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS
FROM THE LAWS OF THE
COMMONWEALTH OF MASSACHUSETTS
GOVERNING THE
RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . until he has received a permit from the board of health or its agent . . . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury**. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

P-302

N. B.—WRITE PLAINLY, WITH UNFADING INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day Laborer, Farm Laborer, Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.)*. For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid Fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of . . . . . (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," 'Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary;" if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death . . . .—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body . . until he has received a permit from the board of health or its agent, . or . . . from the clerk of the town where the person died; . . . **No such permit shall be issued until there shall have been delivered to such board, agent or clerk . . . a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate** . . . The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 46.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

. . . He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death. —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending Physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poison), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation. the sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

FORM R-303

MARGIN RESERVED FOR BINDING

N. B.—WRITE PLAINLY, WITH UNFADING BLACK INK—THIS IS A PERMANENT RECORD. Every item of information should be carefully supplied. MEDICAL EXAMINERS should state CAUSE AND MANNER OF DEATH in plain terms, so that it may be properly classified under the International Classification of Causes of Death. See reverse side for extracts from the laws relative to the return of certificates of death.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk,** . . . a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**—*General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . **He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.**—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) Under cause, the nature of an injury and of its consequences; and (2) under manner, the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) Under cause, its known or presumable nature; and (2) under manner, indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person).....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.—*General Laws, Chap. 38, Sec. 14.*

N.B.—Every item of information should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions on back of certificate.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

[Approved by U. S. Census and American Public Health Association]

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer or Planter, Physician. Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman,* etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner,* (*b*) *Cotton mill;* (*a*) *Salesman,* (*b*) *Grocery;* (*a*) *Foreman,* (*b*) *Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine,* etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework,* or *At home,* and children, not gainfully employed, as *At school* or *At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid,* etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired,* 6 *yrs.*). For persons who have no occupation whatever, write *None.*

Statement of cause of death—Name, first the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum,* etc., *Carcinoma, Sarcoma,* etc., of ..... (name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis,* etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.; Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthonia," "Anemia" (merely symptomatic, "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia,*" "PUERPERAL *peritonitis,*" etc. State cause for which surgical operation was undertaken. For VIOLENT DEATHS, state MEANS OF INJURY and qualify as ACCIDENTAL, SUICIDAL, or HOMICIDAL, or as *probably* such, if impossible to determine definitely. Examples: *Accidental drowning; Struck by railway train—accident; Revolver wound of head—homicide; Poisoned by carbolic acid—probably suicide.* The nature of the injury, as fracture of skull, and consequences (e. g., *sepsis, tetanus*) may be stated under the head of "Contributory." (Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

ALL CERTIFICATES MUST BE WRITTEN PLAINLY, WITH UNFADING BLACK INK.

INFORMANT'S SIGNATURE

Items 1 to 13, inclusive, must be made over the *signature of the informant.*

MEDICAL CERTIFICATE OF DEATH

Items 16 and 17 to be made over the signature of the physician or other person responsible for making this portion of the certificate.

UNDERTAKER'S SIGNATURE

All death certificates must be made over the *signature of the Undertaker* or person acting as such.

RUBBER STAMP SIGNATURES NOT PERMITTED

Informants, Physicians, Coroners, Undertakers and Registrars must not use rubber stamp signatures—death certificates will be permanently preserved, and to be of value for legal purposes—*all signatures must be written with unfading black ink.*

If retired from business, that fact may be indicated thus: *Farmer* (*retired*, *6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs*, *meninges*, *peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

STATE BOARD OF HEALTH OF FLORIDA

BUREAU OF VITAL STATISTICS

52786

County.....

Precinct.....
(Write name, not number)
or

or
City Jacksonville, Fla.

Permit No.....

Removal and Burial Permit

Reg. Dist. No. 13-01

Full name Harris Goldberg; Age 55; Sex M; Color W

Disease causing Death Lobar Pneumonia

Date of death 10/9/27, 19....

Removal to Boston, Mass., via.....

Undertaker Moulton & Kyle Address Jacksonville, Fla.

A Certificate of Death having been filed in my office in accordance with the Laws of Florida, I hereby authorize the removal and burial of the body of said deceased person as stated above.

Dated 10/10, 1927 Registrar's Signature C. H. Perry

Burial Permits must be delivered by the undertaker to the sexton or other persons in charge of the burial ground or cemetery where burial takes place. When the body is to be shipped to a distant point, requiring the service of a common carrier, in addition to the Removal Permit, the body must be accompanied by a Transit Label as required by the State Board of Health. For full particulars see Rules and Regulations governing the transportation of dead bodies.

Sexton's Signature..... Date of Interment.....19.....

This permit must be indorsed by the sexton and returned to the Local Registrar of his district within ten days. If there is no sexton or person in charge of burial ground, the undertaker or person acting as such, shall sign same as sexton, giving date of interment. Write across face of permit the words, **"No person in charge,"** and return to Local Registrar of the district in which interment is made within ten days.

INSTRUCTIONS TO PASSENGER ACCOMPANYING REMAINS

This Burial and Removal Permit must be filled out by the Local Registrar of the registration district in which the death occurred from information stated on the Death Certificate, over his signature.

The transportation company's agent or baggagemaster must detach this portion of the permit and hand it to the person authorized to accompany the remains.

If the body is shipped by express, the express agent must detach this portion of the Transit Permit and attach it to the Waybill, as it must accompany the remains to its destination. The receiving agent to turn over this Permit to the receiving undertaker, or person to whom the body is delivered.

The passenger accompanying the remains must deliver this Permit to the undertaker or person having charge of the burial of the body.

This Permit authorizes the burial of the body of the deceased named on the reverse side of this Permit at any place in the State of Florida.

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of .....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...** The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma, Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. ...*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate...**The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation,** the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died (defined so that it can be classified under the international classification of causes of death), where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. . . .—*General Laws, Chapter 46, Section 9.*

. . . No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health . . . , or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health . . . or from the clerk of the town where the body is buried. **No such permit shall be issued until there shall have been delivered to such board, . . . or clerk, . . .** a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied . . . by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate.** The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. **The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.**— *General Laws, Chap 114, Sec. 45 as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence. If a medical examiner has notice that there is within his county the body of such a person, he shall forthwith go to the place where the body lies and take charge of the same. . . . *General Laws, Chap. 38, Sec. 6.*

. . . **He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.**—*General Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) Attending physicians will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) Board of Health physicians will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) Medical Examiners will investigate and certify to all deaths supposably due to violence. These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from disease resulting from injury or infection related to occupation, the sudden deaths of persons not disabled by recognized disease, and those of persons found dead.

STATEMENT OF CAUSE OF DEATH

Medical Examiners in certifying to a death will state the cause and manner thereof, and will specify: (1) **Under cause,** the nature of an injury and of its consequences; and (2) **under manner,** the mode of its production together with the circumstances when these are known. For example: "Compound fracture of the femur with ensuing septicemia (gas bacillus) caused by a steam railway accident." "Pistol shot wound of the chest with associated hemorrhage, homicidal." "Asphyxiation by suspension, suicidal." "Syncope while under the influence of ether administered as a surgical anæsthetic." "Fracture of the skull with associated internal injury sustained under circumstances unknown."

If investigation shows the death to have been due to disease, specify: (1) **Under cause,** its known or presumable nature; and (2) **under manner,** indicate the circumstances leading to medico-legal inquiry. For example: "Hemorrhage spontaneous, of the brain (basal ganglia) (found dead in bed)." "Heart disease, presumably coronary sclerosis. (Sudden death.)"

DESCRIPTION (for unknown person) .....

.....

.....

.....

.....

.....

NOTICE TO UNDERTAKERS: No embalming fluid, or any substitute therefor, shall be injected into the body of any person supposed to have met his death by violence, until a permit, signed by the Medical Examiner, has first been obtained.— *General Laws, Chap. 38, Sec. 14.*

See instructions and extracts from the laws on back of certificate.

200,000. 9-26. NO. 6373

Dec. 24 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill*; (*a*) *Salesman*, (*b*) *Grocery*; (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.....*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded**, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease**, and those of persons **found dead.**

(Dec 29.1967)

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter, Physician, Compositor, Architect, Locomotive engineer, Civil engineer, Stationary fireman,* etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner,* (*b*) *Cotton mill*; (*a*) *Salesman,* (*b*) *Grocery*; (*a*) *Foreman,* (*b*) *Automobile factory.* The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer, Farm laborer, Laborer—Coal mine,* etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife, Housework,* or *At home,* and children, not gainfully employed, as *At school* or *At home.* Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant, Cook, Housemaid,* etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer (retired, 6 yrs.).* For persons who have no occupation whatever, write *None.*

Statement of cause of death.—Name, first, the Disease Causing Death (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia*; *Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum,* etc., *Carcinoma, Sarcoma,* etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles*; *Whooping cough*; *Chronic valvular heart disease*; *Chronic interstitial nephritis,* etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), 29 *ds.*; *Bronchopneumonia* (secondary), 10 *ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia," "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death.—*Gen. Laws, Chap.* 46, *Sec.* 9.

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap.* 114, *Sec.* 45, *G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap.* 38, *Sec.* 6.

He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap.* 38, *Sec.* 7.

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap.* 114, *Sec.* 46, *G. L., as amended.*

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death. *..Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury or otherwise dispose of a human body in a town, or remove therefrom a human body which has not been buried, until he has received a permit from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the person died; and no undertaker or other person shall exhume a human body and remove it from a town, or from one cemetery to another, until he has received a permit from the board of health or its agent aforesaid or from the clerk of the town where the body is buried. No such permit shall be issued until there shall have been delivered to such board, agent or clerk, as the case may be, a satisfactory written statement containing the facts required by law to be returned and recorded, which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate. If the death certificate contains a recital, as required by section ten of chapter forty-six, that the deceased served in the army, navy or marine corps of the United States in any war in which it has been engaged, such recital shall appear upon the permit. The board of health or its agent, upon receipt of such statement and certificate, shall forthwith countersign it and transmit it to the clerk of the town for registration. The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Chap. 114, Sec. 45, G. L., as amended.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

....He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death.—*Gen. Laws, Chap. 38, Sec. 7.*

No undertaker or other person shall bury a human body or the ashes thereof which have been brought into the commonwealth until he has received a permit so to do from the board of health or its agent appointed to issue such permits, or if there is no such board, from the clerk of the town where the body is to be buried or the funeral is to be held, or from a person appointed to have the care of the cemetery or burial ground in which the interment is made.—*Chap. 114, Sec. 46, G. L., as amended.*

INSTRUCTIONS: This certificate should be carefully supplied. AGE should be stated EXACTLY. PHYSICIANS should state CAUSE OF DEATH in plain terms, so that it may be properly classified. Exact statement of OCCUPATION is very important. See instructions and extracts from the laws on back of certificate.

27-2M

dec. 31. 1927

REVISED UNITED STATES STANDARD CERTIFICATE OF DEATH

(Approved by U. S. Census and American Public Health Association)

Statement of occupation.—Precise statement of occupation is very important, so that the relative healthfulness of various pursuits can be known. The question applies to each and every person, irrespective of age. For many occupations a single word or term on the first line will be sufficient, e. g., *Farmer* or *Planter*, *Physician*, *Compositor*, *Architect*, *Locomotive engineer*, *Civil engineer*, *Stationary fireman*, etc. But in many cases, especially in industrial employments, it is necessary to know (*a*) the kind of work and also (*b*) the nature of the business or industry, and therefore an additional line is provided for the latter statement; it should be used only when needed. As examples: (*a*) *Spinner*, (*b*) *Cotton mill;* (*a*) *Salesman*, (*b*) *Grocery;* (*a*) *Foreman*, (*b*) *Automobile factory*. The material worked on may form part of the second statement. Never return "Laborer," "Foreman," "Manager," "Dealer," etc., without more precise specification, as *Day laborer*, *Farm laborer*, *Laborer—Coal mine*, etc. Women at home, who are engaged in the duties of the household only (not paid *Housekeepers* who receive a definite salary), may be entered as *Housewife*, *Housework*, or *At home*, and children, not gainfully employed, as *At school* or *At home*. Care should be taken to report specifically the occupations of persons engaged in domestic service for wages, as *Servant*, *Cook*, *Housemaid*, etc. If the occupation has been changed or given up on account of the DISEASE CAUSING DEATH, state occupation at beginning of illness. If retired from business, that fact may be indicated thus: *Farmer* (*retired, 6 yrs.*). For persons who have no occupation whatever, write *None*.

Statement of cause of death.—Name, **first**, the DISEASE CAUSING DEATH (the primary affection with respect to time and causation), using always the same accepted term for the same disease. Examples: *Cerebrospinal fever* (the only definite synonym is "Epidemic cerebrospinal meningitis"); *Diphtheria* (avoid use of "Croup"); *Typhoid fever* (never report "Typhoid pneumonia"); *Lobar pneumonia; Bronchopneumonia* ("Pneumonia," unqualified, is indefinite); *Tuberculosis of lungs, meninges, peritoneum*, etc., *Carcinoma*, *Sarcoma*, etc., of.....(name origin; "Cancer" is less definite; avoid use of "Tumor" for malignant neoplasms); *Measles; Whooping cough; Chronic valvular heart disease; Chronic interstitial nephritis*, etc. The contributory (secondary or intercurrent) affection need not be stated unless important. Example: *Measles* (disease causing death), *29 ds.; Bronchopneumonia* (secondary), *10 ds.* Never report mere symptoms or terminal conditions, such as "Asthenia," "Anemia" (merely symptomatic), "Atrophy," "Collapse," "Coma," "Convulsions," "Debility" ("Congenital," "Senile," etc.), "Dropsy," "Exhaustion," "Heart failure," "Hemorrhage," "Inanition," "Marasmus," "Old age," "Shock," "Uremia,", "Weakness," etc., when a definite disease can be ascertained as the cause. Always qualify all diseases resulting from childbirth or miscarriage, as "PUERPERAL *septicemia*," "PUERPERAL *peritonitis*," etc.

State cause for which surgical operation was undertaken.

(Recommendations on statement of cause of death approved by Committee on Nomenclature of the American Medical Association.)

Bronchopneumonia: If primary cause, write the word "primary"; if secondary, give primary cause.

Certificates will be returned for additional information which give any of the following diseases, without explanation, as the sole cause of death: Abortion, cellulitis, childbirth, convulsions, hemorrhage, gangrene, gastritis, erysipelas, meningitis, miscarriage, necrosis, peritonitis, phlebitis, pyemia, septicemia, tetanus.

EXTRACTS

FROM THE LAWS OF THE

COMMONWEALTH OF MASSACHUSETTS

GOVERNING THE

RETURN OF CERTIFICATES OF DEATH

A physician or registered hospital medical officer shall forthwith, after the death of a person whom he has attended during his last illness, at the request of an undertaker or other authorized person or of any member of the family of the deceased, furnish for registration a standard certificate of death, stating to the best of his knowledge and belief the name of the deceased, his supposed age, the disease of which he died, defined as required by section one, where same was contracted, the duration of his last illness, when last seen alive by the physician or officer and the date of his death....—*Gen. Laws, Chap. 46, Sec. 9.*

No undertaker or other person shall bury a human body...until he has received a permit from the board of health or its agent...or... from the clerk of the town where the person died;...**No such permit shall be issued until there shall have been delivered to such board, agent or clerk...a satisfactory written statement containing the facts required by law to be returned and recorded,** which shall be accompanied, in case of an original interment, by a satisfactory certificate of the attending physician, if any, as required by law, or in lieu thereof a certificate as hereinafter provided. **If there is no attending physician, or if, for sufficient reasons, his certificate cannot be obtained early enough for the purpose, or is insufficient, a physician who is a member of the board of health, or employed by it or by the selectmen for the purpose, shall upon application make the certificate required of the attending physician. If death is caused by violence, the medical examiner shall make such certificate**...The person to whom the permit is so given and the physician certifying the cause of death shall thereafter furnish for registration any other necessary information which can be obtained as to the deceased, or as to the manner or cause of the death, which the clerk or registrar may require.—*Gen. Laws, Chap. 114, Sec. 45.*

Medical examiners shall make examination upon the view of the dead bodies of only such persons as are supposed to have died by violence.—*Gen. Laws, Chap. 38, Sec. 6.*

...He shall in all cases certify to the town clerk or registrar in the place where the deceased died his name and residence, if known; otherwise a description as full as may be, with the cause and manner of death —*Gen. Laws, Chap. 38, Sec. 7.*

RULES OF PRACTICE

The fulfilment of the purpose of these laws calls for the observance of the following rules of practice:

(1) **Attending physicians** will certify to such deaths only as those of persons to whom they have given bedside care during a last illness from disease unrelated to any form of injury.

(2) **Board of Health Physicians** will certify to such deaths only as those of persons who, though disabled by recognized disease unrelated to any form of injury, have died without recent medical attendance or whose physician is absent from home when the certificate of death is needed.

(3) **Medical examiners** will investigate and certify to all deaths **supposably due to injury.** These include not only deaths caused directly or indirectly by traumatism (including resulting septicemia), and by the action of chemical (drugs or poisons), thermal, or electrical agents, and deaths following abortion, but also deaths from **disease resulting from injury or infection related to occupation**, the **sudden deaths of persons not disabled by recognized disease,** and those of persons **found dead.**
